About the Author	ix
Introduction	x
Acknowledgments and Thanks.....	xi
Terminology.....	xii
Part I: Getting Started	1
Chapter 1: Setup and Parts of the Environment.....	3
Starting dBASE Plus.....	3
Look and Feel	3
TabBar	4
Application Theme	4
Navigator Changes	4
Some Basic Setup.....	5
The Command Window.....	7
The Designers	7
SQL and Data Module Designers	7
The Source Code Editor	8
New Fonts	8
dComplete	9
dLocator	10
dBable	11
dBlocks	11
Other New Features	12
dExtract	13
Online Help.....	13
dPreview	13
Compiler	14
File Locations	14
Reports	16
Other New Functionality (dBASE Plus 11)	16
ASSIST™	16
Touch / Gesture Support	17
Appearance.....	17
Lookup Tables.....	17
Bug Fixes	17
Windows XP?	18
Summary	18
Chapter 2: The Data Module Designer – dmDesigner™	19
What is Different?.....	19
The Data Module Designer.....	19
A Simple Data Module	20
Using a Data Module	22
A More Complex Data Module	24
Multi-Table View.....	29
Report View	30
dmOutput™	32

Table of Contents

Other Wizards In dmDesigner™	38
The Print Wizard – dmOutput™	39
Sample Code for This Chapter	40
Summary	40
Chapter 3: dmC.R.U.D.™	41
Starting the Wizard	41
Source Code.....	45
Sample Code for This Chapter	46
Summary.....	46
Part II: Data.....	47
Chapter 4: SQL Server Databases	49
SQL Databases	49
The Basic Architecture of SQL Databases	50
Firebird – A Free SQL Database Server	51
Installing the Firebird Server.....	52
Installing ODBC Drivers for Firebird	52
ODBC Setup.....	52
Create a Firebird Database	56
Setup Connection Aliases in dBASE	59
Users	62
User Permissions	64
Database Security.....	65
Turning the Server On/Off	66
Summary.....	68
Chapter 5: ADO Database Classes.....	69
Why Use ADO?	69
Basic ADO Concepts	69
The ADO Connection Alias.....	70
The ADODatabase Class	70
The ADOQuery Class	76
The ADOTable Class	79
The ADORowset Class	79
The ADOFieldArray Class	81
The ADOField Class	82
The ADOError Class.....	82
The ADOErrorArray Class.....	83
The ADOException Class	83
The ADOSTream Class	84
Other ADO Database Classes.....	86
Sample Code for This Chapter	87
Summary.....	87
Chapter 6: Using ADO Database Classes in an Application, Part 1	89
Data on the Server vs. Local Data.....	89
Two Connections?.....	90
Using SQL.....	91
Creating Tables in Your Database.....	91
The Sample Data.....	92
Creating an Application with SQL Server Data	95

Application Concepts	95
The Data Layer	97
Create a Data Module.....	97
Add the ADOQuery Objects	100
Adding Code	102
The Business Layer	113
Sample Code for This Chapter	115
Summary	116
Chapter 7: Using ADO Database Classes in an Application, Part 2	117
The User Interface Layer	117
Application Assumptions.....	118
Create a Custom Form	118
Create Custom Controls.....	121
Back to the Custom Form	125
The Customer Form	127
Navigating the Table	133
Editing the Data	142
Finding a Record.....	150
The Inventory Form	155
Other Forms	158
Sample Code for This Chapter	159
Summary	160
Chapter 8: Using ADO Database Classes in an Application, Part 3	161
Multi-Table Forms.....	161
The Line Items Form	161
The Invoices Form	176
Duplicate Records?	197
Back to the Business Layer	198
Making a Full Application	201
User Interface Code and "Efficiency"	201
Naming the Controls	201
Code Changes	202
Sample Code for This Chapter	203
Summary	204
Part III: New Features and Functionality.....	205
Chapter 9: New Graphics Engine and New Images	207
The Graphics Engine	207
File Formats.....	207
Large Icon Format	208
Editing Images	208
New Images by glyFX	208
Other Images.....	210
Textures.....	214
DoubleBuffered	215
Miscellaneous.....	217
Pushbutton – scaleBitmaps Property	217
Pushbutton – themeBackground Property	217
Image – transparent Property	217

Table of Contents

Sample Code for This Chapter	218
Summary.....	218
Chapter 10: The Grid Controls	219
Grid Enhancements.....	219
The New GridEx Control.....	221
GridEx and Components	221
The GridEx Control	221
columnLens Control	222
GridExColumn Control	222
Building a Grid.....	223
Example 1 – The Fish Table	223
Sample Code for This Chapter	231
Summary.....	231
Chapter 11: The ListView Control	233
What Is It?.....	233
The ListView Object	234
The ListView Columns Objects	236
ListView Examples	238
A Small List of Movies	238
A File List	240
Work With a Table	242
Other Examples.....	245
Sample Code for This Chapter	246
Summary.....	246
Chapter 12: The SQL Builder	247
A Simple SQL Query.....	247
More Complex – Multiple Tables	252
Sample Code for This Chapter	255
Summary.....	255
Chapter 13: ActiveX Controls.....	257
The dJV Controls (JEDI).....	257
dJVClockX Control.....	257
dJvDirectoryListboxX Control.....	258
dJvDriveComboX Control	258
dJvFileListBoxX Control	259
dJvRichEditX Control	260
Sample Code for This Chapter	263
Summary.....	263
Chapter 14: Callbacks.....	265
Callback Elements.....	265
GETCALLADDRESS.....	265
CALLBACK	265
RELEASE CALLBACK.....	265
Sample Code.....	266
Sample Code for This Chapter	268
Summary.....	268
Chapter 15: Miscellaneous Updates	269
High Precision Math.....	269

New Number Object.....	270
SET HIGHPRECISION	271
Storing High Precision Numbers.....	271
PushButton themeBackground Property.....	272
Form onDisplayChange Event.....	272
Other Touch Screen Features	273
SubForm – Properties Added.....	273
Debugger	273
Another Debugging Tool	274
Compiler, Symbol Space.....	275
Lookup Data	276
Third Party Software	282
FotoGraphix	282
Resource Hacker	282
Multi-Language Applications Using DLL Files.....	285
Sample Code for This Chapter	288
Summary	288
Chapter 16: Building Your Application and Deploying It	291
New Application Properties	291
TabBar	291
Themes.....	292
Building Your Executable	293
File Location Concerns.....	293
Embed Runtime in Executable	293
Deployment Issue.....	295
Build With No BDE Option	297
Modifying the EXE with Resource Hacker	298
Deploying the Application	298
Deploying ActiveX Controls	299
Using the Project Manager	299
Inno Setup	301
File Locations	302
Deploying Resource Files	302
Using the Project Explorer	303
Using Inno Setup.....	303
Deploying an ADO Application	304
Using the Project Explorer	305
Using Inno Setup (Only).....	314
Project Explorer Updates	319
Other Changes/Concerns.....	321
Windows XP Support Gone.....	321
Include Object Code in Project?.....	321
Sample Code for This Chapter	322
Summary	322
Part V: dBASE and the Web	323
Chapter 17: Creating a dBASE Web Application – dmWeb™	325
Web Servers	325
CGI (Common Gateway Interface).....	325
Getting Started	326
Download and Install Apache	326

Table of Contents

Using dmWeb™	331
Copy the Table Needed	332
Start dmWeb™	332
Remote Data Entry	333
Copy Two Folders	342
Run the Application.....	342
Writing Your Own Web Applications.....	344
Deploying a Web Application	344
Sample Code for This Chapter	345
Summary.....	345
The Appendices	347
Appendix 1: Resources Available.....	349
dBase, LLC.....	349
Newsgroups	349
dBASE PLUS Tutorials.....	350
dBASE Knowledgebase	350
dBASE Users' Function Library Project (dUFLP)	350
dBulletin	351
dBASE Related Websites	351
Other dBASE Books.....	352
Appendix 2: A Brief History of dBASE	353
Appendix 3: Source Code Editor Abbreviations.....	355
Appendix 4: Using MySQL with dBASE	358
Installing the MySQL Server.....	358
Installing MySQL Connector	361
ODBC Setup.....	362
More Control Over Your MySQL Databases	366
Setup Connection in dBASE (for ADO)	369
Creating Tables in Your Database	369
Migrating DBF Data to MySQL.....	370
Special Notes – MySQL.....	371
Index	373
